付 款 說 明

你可透過以下方法付款：

1. 電子付款

   你可透過電話、銀行自動櫃員機或互聯網付款。請留意你每天的可繳款限額和有關的繳款服務機構每天截數的時間。

   稅務局的「繳費靈」商戶編號為「10」。請致電「18013」登記帳單及「18033」交費。請注意你的商業登記證號碼每年都不相同，因此每次繳款前，請先登記有關帳單。

   你可以在任何貼有「繳費服務」標誌的滙豐銀行／恒生銀行自動櫃員機或貼有「繳費易」標誌的「銀通」自動櫃員機，使用提款卡繳款。

   如欲透過網上付款，你可以進入本局網頁<www.ird.gov.hk>。在「稅務資料 —— 其他」目錄選擇「繳稅及退稅」，然後選擇「付款辦法」下的「互聯網付款」。請依照指示付款。

   你亦可透過電子支票支付網站<www.payecheque.gov.hk>上載電子支票／電子本票付款。請瀏覽該電子支票支付網站以獲取詳細指示。

2. 郵遞付款

   請把支票連同本繳款通知書一併寄回「香港告士打道郵政局郵箱29015號稅務局局長收」。切勿郵寄現金，並預留足夠郵遞時間。本局恕不接納期票。

   支票須加劃線並註明支付「香港特別行政區政府」。請在支票背面寫上商業登記證號碼。

3. **親臨付款**

   你可以攜同本繳款通知書到下列繳款處付款：

   郵政局

   請攜同本繳款通知書到全港任何一間郵政局以現金、支票或「易辦事」付款。有關各區郵政局的地址及辦公時間，請瀏覽香港郵政網頁<www.hongkongpost.hk>或致電其查詢熱線 2921 2222。

   便利店

   請攜同本繳款通知書到全港任何一間7-Eleven便利店、OK便利店、VanGo便利店及香港華潤萬家超級市場以現金付款。每次繳款金額上限為5,000元。

   商業登記署

   請攜同本繳款通知書往香港灣仔告士打道5號稅務大樓4樓以現金、支票或「易辦事」繳款。如你未持有商業登記繳款通知書，請先到查詢櫃位索取繳款通知書，然後付款。

   收款時間：　星期一至五　上午8時45分至下午5時正

注意

i) 使用電子付款繳交商業登記費，請輸入商業登記證號碼。號碼末端如為'A'字，在使用電話或銀行自動櫃員機付款時，請無需輸入該'A'字。如透過銀行的互聯網上付款時，某些銀行或會要求客戶一併輸入'A'字，請留意個別銀行指示。

ii) 如以支票付款，收據須在支票首次提交付款銀行獲得兌現後，才屬有效。

iii) 如以電子／郵寄方式或親身到便利店付款，有效的商業登記證將於付款後寄回。

iv) 如你親身到郵局以罰款通知書繳款，有效的商業登記證將於付款後寄回。

v) 除非已繳妥有關費用，否則該商業登記證根據《商業登記條例》第6(5)條並不視為有效。

vi) 過期繳付登記費及徵費會被加徵罰款（1年證：總行$300、分行$71；3年證：總行$900、分行$213）。

vii) 如需進一步資料，請瀏覽本局網頁或致電查詢熱線 187 8088。

Article 17: RETRANSFER OF THE PREMISES

17.1 Upon the expiry of Term or termination of this Agreement, the Lessee shall transfer the Premises to the Lessor in good condition and shall leave all immovable items on 'as it is' basis within a reasonable period of time as the Lessee deems necessary at least two (2) months without paying any rent, fee or charge to the Lessor.

17.2 The Lessee shall settle in full all dues incurred under this Agreement and shall also provide the Lessor with documents in support of such settlement.

Article 18: MINERAL RESOURCES AND TREASURES

18.1 All mineral resources, treasures, fossils and structures and other remains or items of geological or archaeological interest found on the Premises shall be placed under the care and authority of the Lessor. The Lessee shall take reasonable precautions to prevent from removing or damaging any of these findings.

18.2 The Lessee shall, upon discovery of any such finding, promptly give notice to the Lessor, who shall issue instructions for dealing with it. If the Lessee suffers suspension of full possession or use of the Premises as it is intended and/or incurs cost from complying with the instructions, the Term shall be extended to the extent of such suspension and the Lessee shall be entitled to payment of such cost.

Article 19: LANGUAGE

If this Agreement is translated into any language other than English, the translation is reference only and the English language texts in this Agreement shall always prevail.

Article 20: ARBITRATION

In the event of any disputes between the Parties, the Parties agree to conduct an amicable settlement in the first stage. Any dispute, controversy or claim arising out of or relating to this Agreement or the breach, termination or invalidity thereof, which cannot be settled amicably in the first stage shall be referred to and finally resolved by arbitration under the Myanmar Arbitration Law 2016 through two (2) arbitrators and one (1) umpire. The Lessor and the Lessee shall each appoint an arbitrator and the arbitrators shall nominate the umpire. The language of arbitration shall be English. The cost for such arbitration proceedings shall be borne by the Party against whom the award is made.

Article 21: SEVERABILITY OF PROVISIONS

In case where any provision of this Agreement is determined to be illegal or invalid, such illegality or invalidity shall not affect the validity and effect of the remaining provisions of this Agreement.

Article 22: ENTIRE AGREEMENT AND AMENDMENT

This Agreement shall constitute the entire agreement and understanding of the parties as to the subject matter of this Agreement and supersedes all prior oral or written agreements, arrangements or understandings between the Parties. This Agreement may be amended only in a writing signed by the Parties.

Article 23: PUBLIC ANNOUNCEMENTS

A Party shall notify the other Party in advance in case of a public announcement except for the case when such announcement is required under

the relevant laws or regulations or ordered by the relevant government authorities.

Feed product list(Poultry)

Item		Product image	Description
BROILER	Pre-starter		- Appearance form : Crumble - Color : Light brown - Feeding period : 0week ~ 2week - Product technology : Stimulation of early growth performance : Use of high digestibility raw material
	Starter		- Appearance form : Crumble - Color : Light brown - Feeding period : 3week ~ 4week - Product technology : Mortality prevention by Nutrient Value Control : Control the amino acid and energy level for final wight
	Grower		- Appearance form : Pellet - Color : Light brown - Feeding period : 5week ~ Culling - Product technology : Maximization of Final body weight performance and FCR : Set up of optimum Nutrients(Energy, Crude protein, etc.)
LAYER	Pre-Starter		- Appearance form : Mash or Crumble or Pellet - Color : Yellow or brown - Feeding period : 0week ~ 6week - Product technology : Prevention of a disease and improving immune system : Use of high digestibility raw material
	Starter		- Appearance form : Mash or Crumble or Pellet - Color : Yellow or brown - Feeding period : 7week ~ 10week - Product technology : Nutrients setting for organ development(Gut) on pullet : Set up the nutrients for target body weight
	Grower		- Appearance form : Mash or Crumble or Pellet - Color : Light brown - Feeding period : 10week ~ 19week - Product technology : Nutrition setting for weight management : Use of effective raw material, body fat prevention
	Pre-lay		- Appearance form : Mash or Crumble or Pellet - Color : Light brown - Feeding period : 17week ~ 19week - Product technology : Preparation of laying on 17~19week : Use of coarse particle limestone, control the Ca:P ratio
	Layer (Stage 1,2,3)		- Appearance form : Mash or Crumble or Pellet - Color : Light brown - Feeding period : ① 20week ~ 45week ② 46week ~ 60week ③ 61week ~ Cullling - Product technology : Maintain the peak egg production until 90% over : Improving the egg quality on old laying hens

SWINE	Piglet		- Appearance form : Pellet - Color : brown - Feeding period : 3 week ~ 8 week - Use raw material : Corn, Soy bean meal, Milk by - products, fish meal etc. - Product technology : Stimulation of early growth performance : Use of high digestibility raw material
	Starter		- Appearance form : Pellet - Color : brown - Feeding period : 8 week ~ 18 week - Use raw material : Corn, Soy bean meal, fish meal etc. - Product technology : Energy & amino acid for making body shape : Use of good digestibility raw material
	Grower		- Appearance form : Pellet - Color : brown - Feeding period : 18 week ~ 28 week - Use raw material : Corn, Soy bean meal, etc. - Product technology : Energy & amino acid for growing faster : Use of cost effective raw material
	Gestating sow		- Appearance form : Pellet - Color : brown - Feeding period : Gestation period - Use raw material : Corn, Soy bean meal, etc. - Product technology : Maintaining gestation, increasing stomach density : Use of bulky raw material
	Lactating sow		- Appearance form : Pellet - Color : brown - Feeding period : Lactation period - Use raw material : Corn, Soy bean meal, etc. - Product technology : Lactation for piglets, preparation next parity : Maintain body tissue reservation : Energy & amino acid, dEB* technology applied

*dEB: dietary electrolyte balance

MASH

▶ uniformly mixed product according to the own formulation
by accurately weighing grinded materials
for providing suitable nutrient to livestocks on each stage of groth

grinding	scaling	dosing	shifting
<Grinder>	<Scale>	<Mixer>	<Rotary Dresser>
			
particle sizing for each material Corn, wheat, meal	accurately weighing main/sub materials and additives according to the own formulation	uniformly mixing by adding liquids to weighed materials	Remove the foreign substance that incorporated in the products

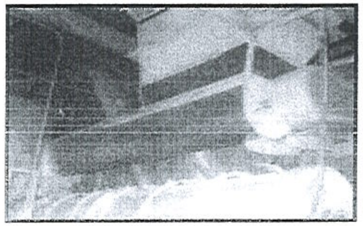

PELLET

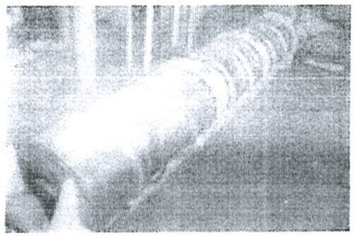

▶ one of processed product type that pressed out the mixed materials for protecting monophagia, increasing palatability and improving rate of gain.

Feeding & Conditioning

<Feeder, Conditioner>

quantitative supply and material steaming for mixing and riping

PELLETING

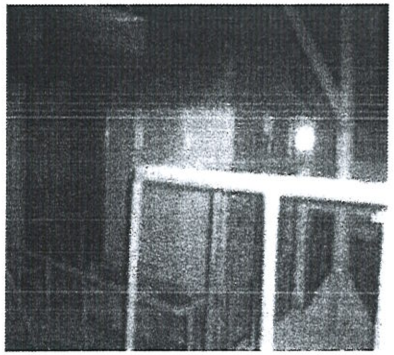

<Pellet Mill>

press out product uniformly using die & roll

COOLING

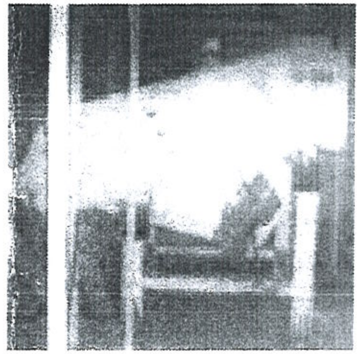

<Cooler>

remove the moisture on the product

SHIFTING

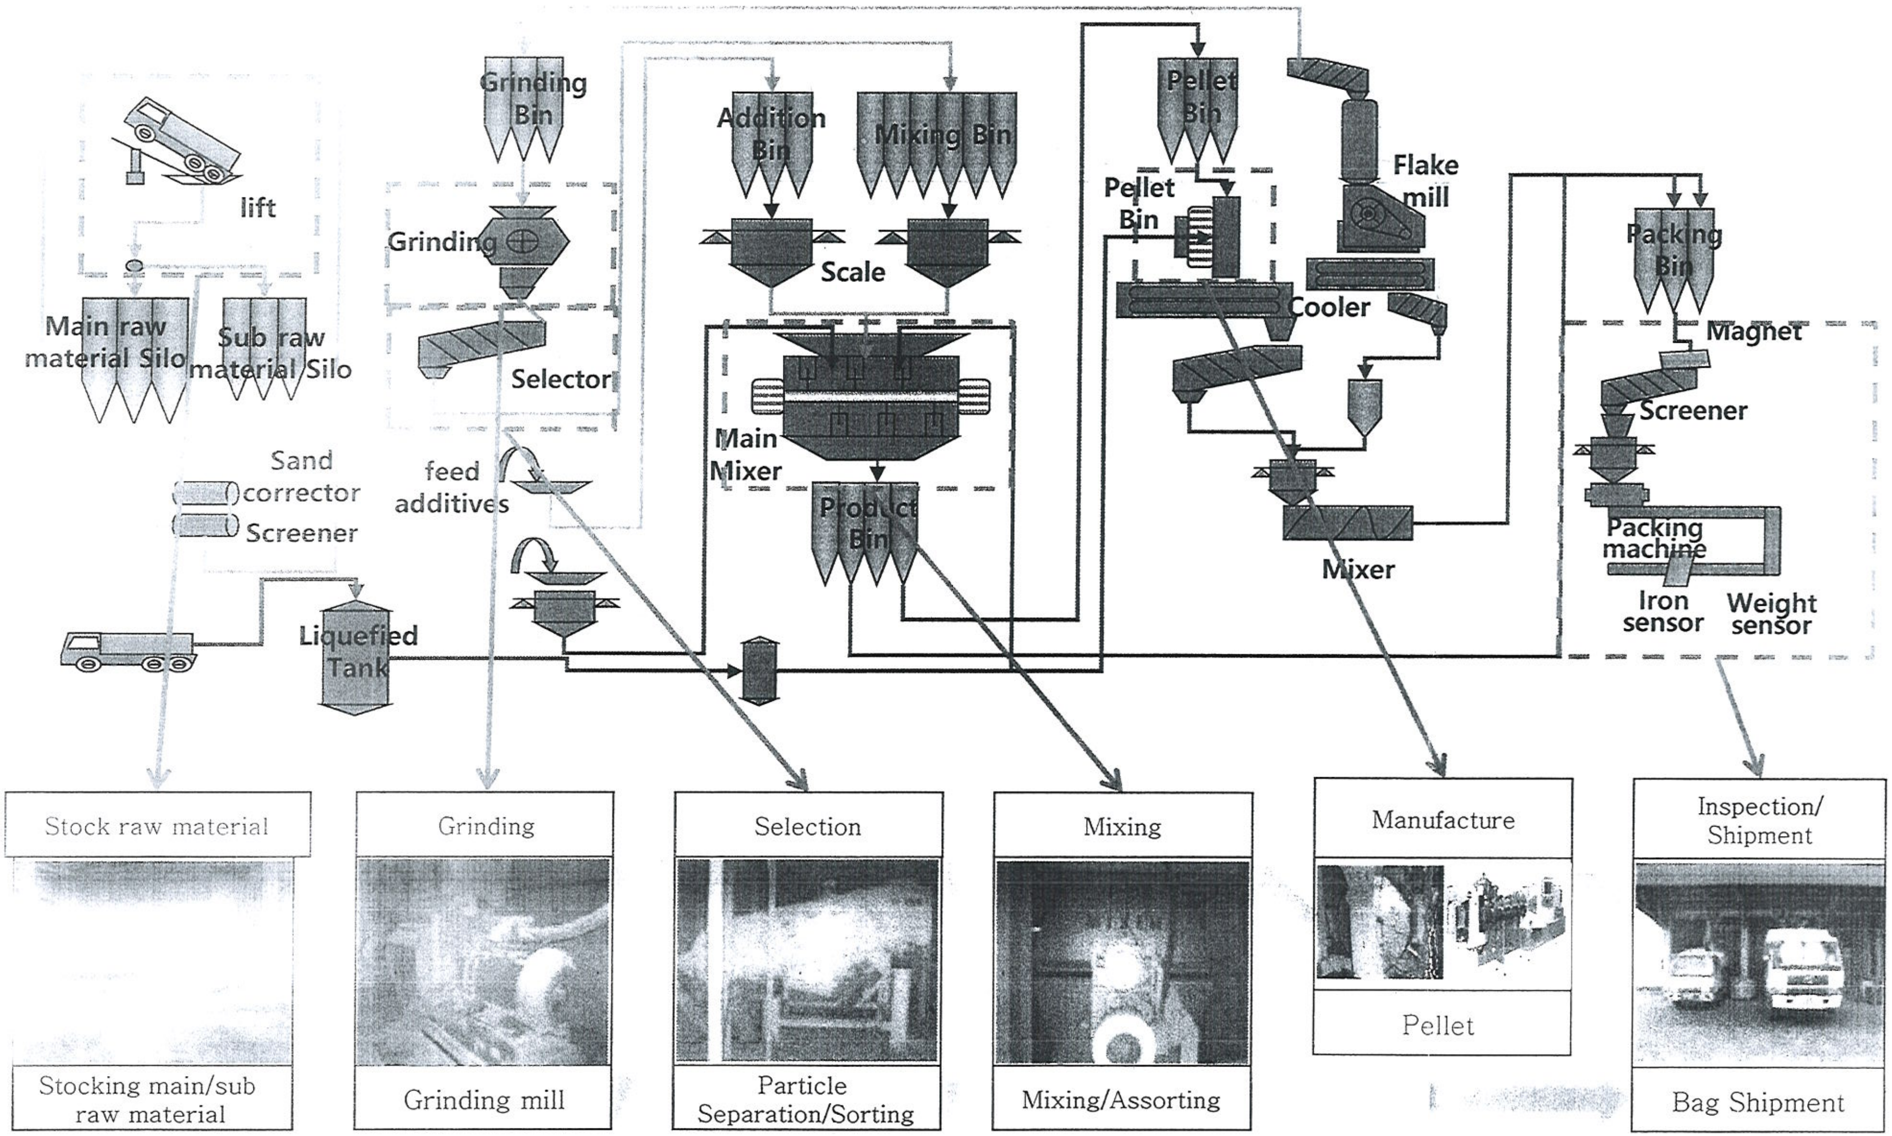

<Shifter>

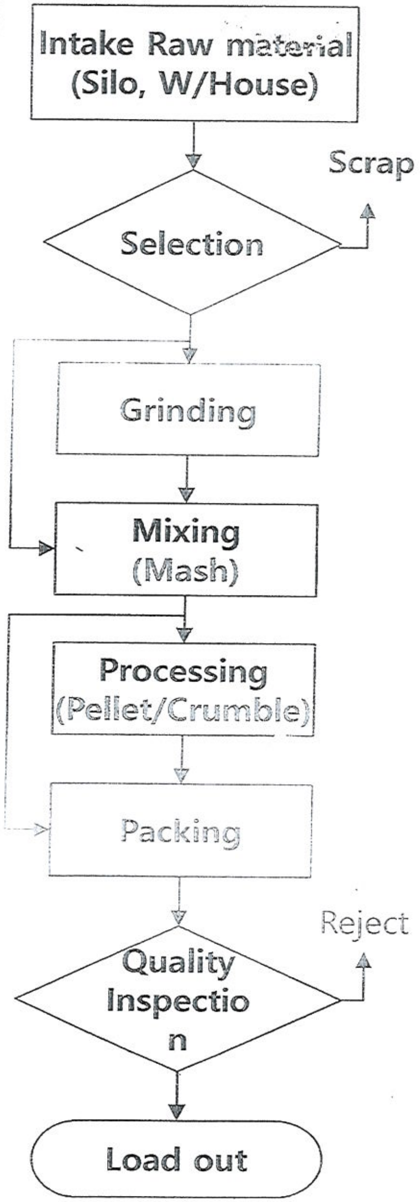

remove the non-standards and foreign substance

Feed production process

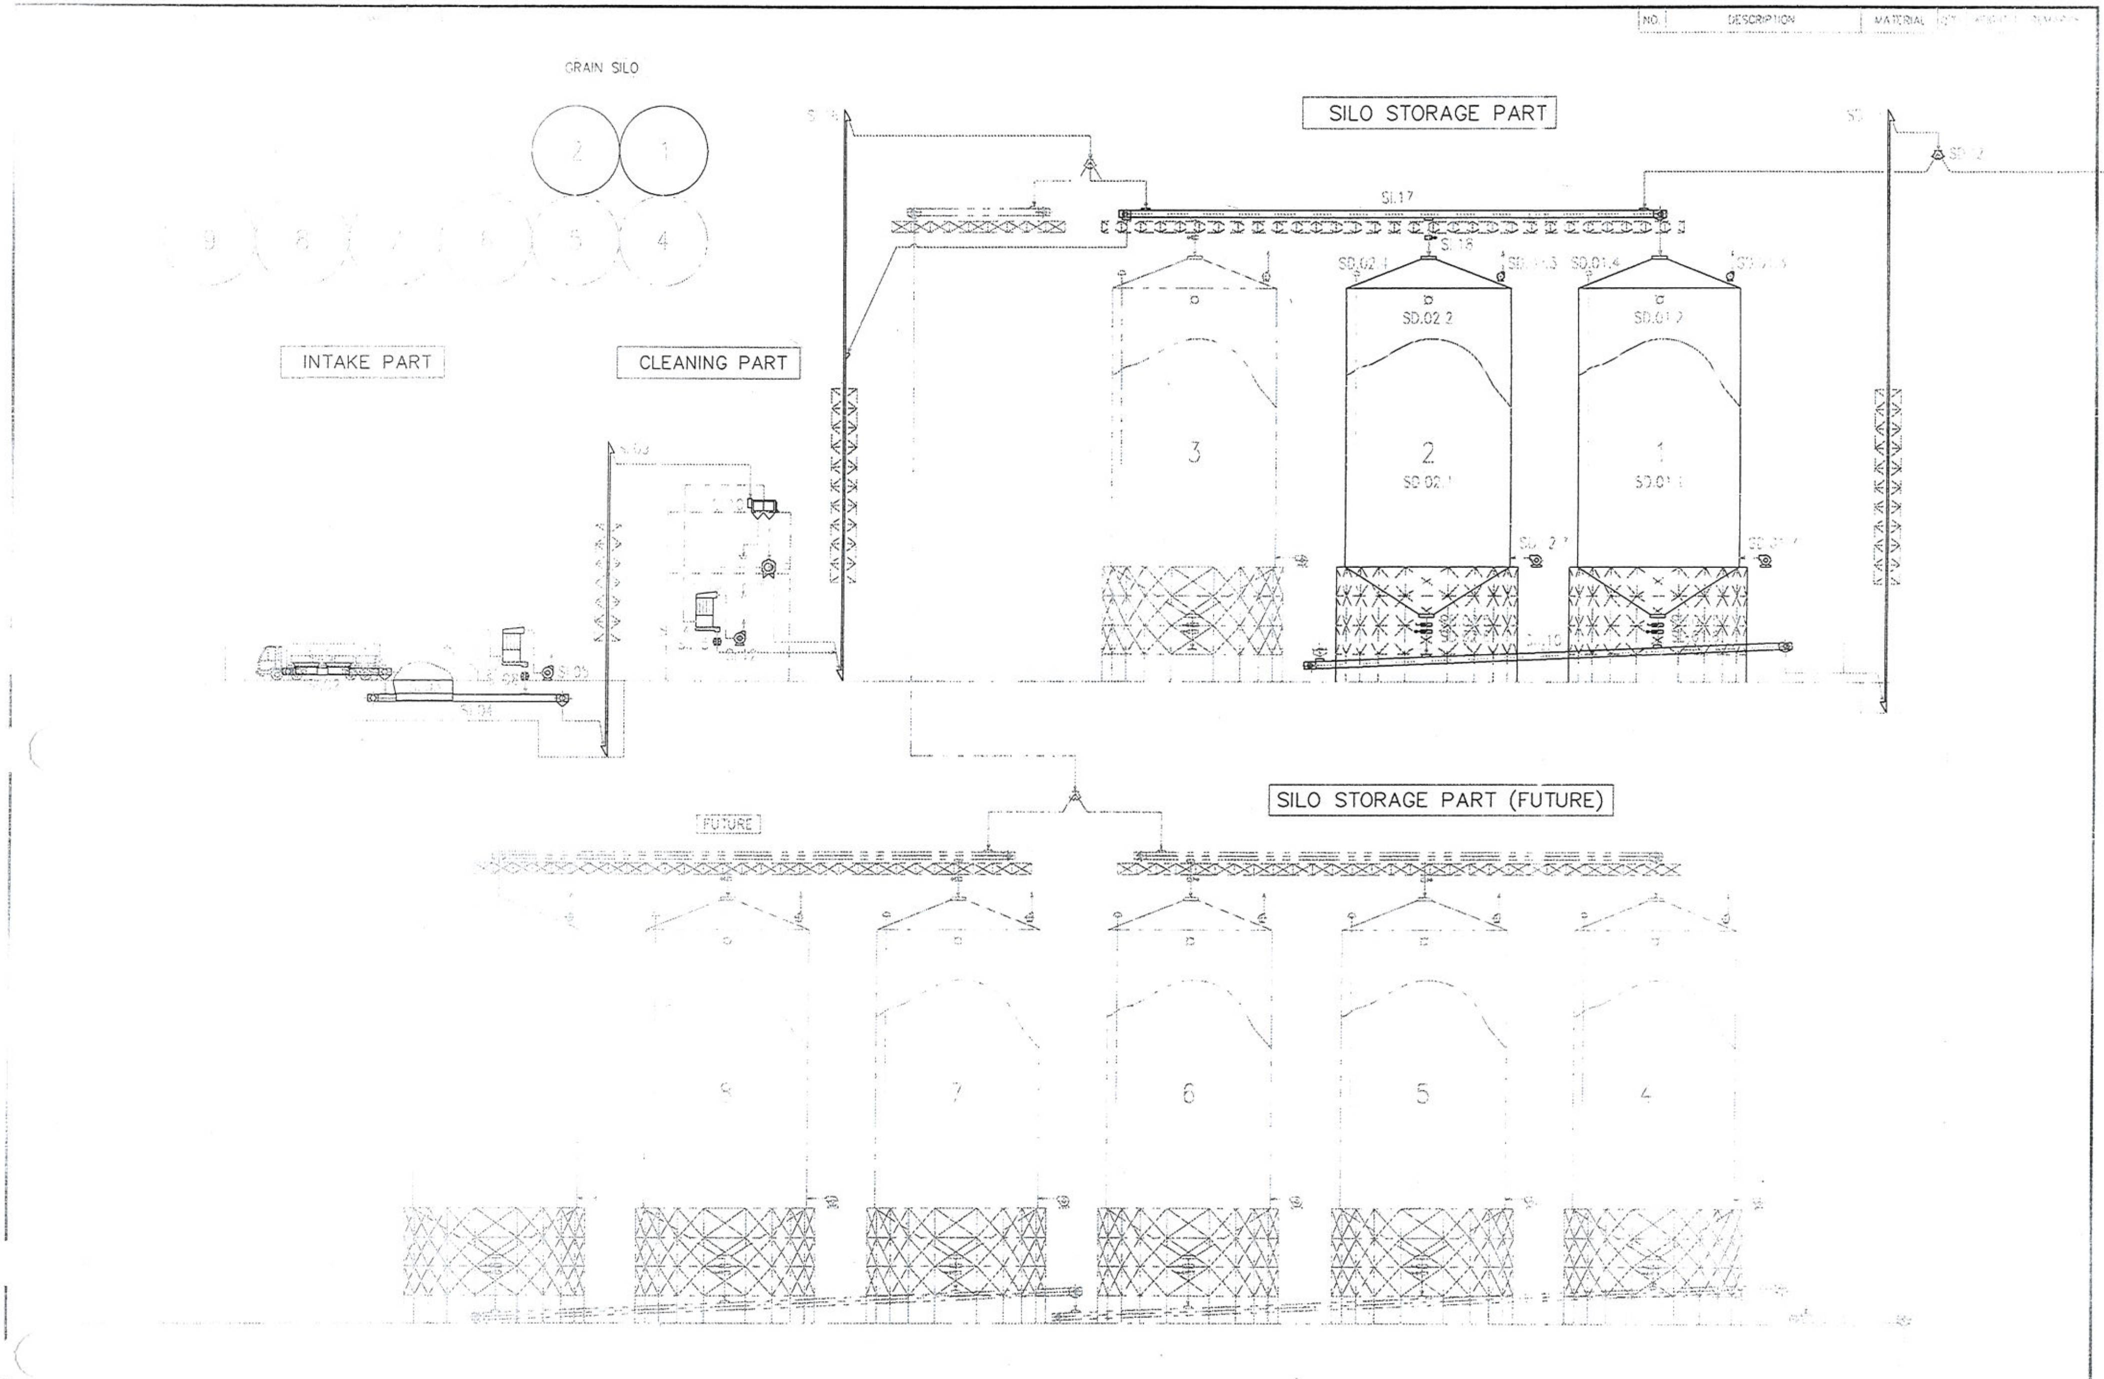

- Feed production process

Feed production process

- Minimize the freshness decline by first in first out and checking amount of material how much we need
- Remove alien substance which are adulteration, iron goods and etc.
- Grind each materials and select the materials according to grain size
- Weigh each materials and mix uniformly following designed formulation
- Process the mixed mash feed for easy to intake and digest by heat and pressure
- Pack products according to the feeding type and transportation type
- Inspect nutrition ingredient and physical quality
- Weighing after loading products to transport vehicle and check the weight

Directors' Report and Financial Statements
For the year ended 31 December 2013

Report of the directors

The directors submit herewith their annual report together with the audited financial statements for the year ended 31 December 2013.

Principal place of business

CJ Global Holdings Limited (the "Company") is a company incorporated and domiciled in Hong Kong and has its registered office and principal place of business at Suite 3003, 30/F, Central Plaza, 18 Harbour Road, Wanchai, Hong Kong.

Principal activities

The principal activities of the Company are investment holdings, the management of its investments and the provision of finance to related companies. The principal activities and other particulars of the subsidiaries are set out in note 12 to the financial statements.

Financial statements

The loss of the Company and its subsidiaries (the "Group") for the year ended 31 December 2013 and the state of the Company's and the Group's affairs as at that date are set out in the financial statements on pages 6 to 69.

Transfer to reserves

Losses attributable to shareholders of HK$54,800,000 (2012: profits of HK$182,188,000) have been transferred to reserves. Other movements in reserves are set out in the consolidated statements of changes in equity.

Fixed assets

During the year, the Group acquired properties (including leasehold improvements and land) for approximately HK$160 million and plant and equipments (including construction in progress) for approximately HK$196 million for the Group's factories. Details of these movements and other movements are set out in note 9 to the consolidated financial statements.

Share capital

Details of share capital of the Company are set out in note 23(c) to the financial statements. There were no movements during the year.

Directors

The directors during the financial year and up to the date of this report were:

Shin Dong Ki
Yoo Jong Ha
Ann Byoung Woo (appointed on 2 December 2013)
Park Ho In (resigned on 14 March 2013)

There being no provision in the Company's articles of association in connection with the retirement of directors, all existing directors continue in office for the following year.

Share option scheme

Under a share option agreement dated 28 March 2008, the Company issued a share option scheme to two directors (hereinafter called "Grantees") of the Company to take up the options to subscribe for shares of the Company or in the form of cash. The purpose of this scheme is to provide an opportunity to the Grantees to acquire an equity participation in the Company and its shares for the work towards enhancing the value of the Company and its shares for the benefit of the Company and its shareholder as a whole. The share option scheme shall be valid and effective for a period of 8 years ending 27 March 2016 and it vested on 31 March 2011. The options are exercisable within a period of 5 years expiring on 27 March 2016.

No other share option scheme to employees or directors of the Company and the Group has been adopted or granted. During the year, a director of the Company, Mr Park Ho In, resigned on 14 April 2013. As a result of his resignation, the Company settled the share options granted to the director and outstanding as at his resignation date in the form of cash and cancelled them on the same date. The number of options settled was 150,000 and the cash payment amounted to HK$978,000.

At 31 December 2013, a director of the Company had the following interests in options to subscribe for shares of the Company or in the form of cash granted for nil consideration under the share option scheme of the Company. The options are unlisted and each option gives the holder the right to subscribe for one ordinary share each of the Company.

	No. of options outstanding at the beginning of the year	*No. of options outstanding at the year end*	*Date granted*	*Period during which options are exercisable*	*Exercise price per share*	*Fair value per share at the grant of options*	*No. of options outstanding at the year end*
Shin Dong Ki	150,000	150,000	28 March 2008	1 April 2011 to 27 March 2016	HK$ 5.00	HK$ 5.06	HK$ 9.94

Information on the accounting policy for the share options granted and the estimated fair value per option is provided in notes 1(q) (iii) and 28 to the financial statements respectively.

Share option scheme (continued)

Apart from the foregoing, at no time during the year was the Company, or any of its holding companies, subsidiaries or fellow subsidiaries a party to any arrangement to enable the directors of the Company to acquire benefits by means of the acquisition of shares in or debentures of the Company or any other body corporate.

Directors' interest in contracts

No contract of significance to which the Company, or any of its holding companies, subsidiaries or fellow subsidiaries was a party, and in which a director of the company had a material interest, subsisted at the end of the year or at any time during the year.

Retirement schemes

The Group operates a defined retirement schemes for certain employees located outside Hong Kong in accordance with the local rules and regulations. The employees of the subsidiaries located in the Mainland of People's Republic of China ("the PRC") are members of the state-sponsored retirement schemes organised by the government of the PRC. These subsidiaries are required to contribute a certain percentage of payroll to the retirement scheme to fund the benefits. The only obligation of the subsidiaries with respect to the retirement schemes is the required contributions under the retirement schemes.

Particulars of these retirement schemes are set out in note 27 to the financial statements.

Auditors

KPMG retire and, being eligible, offer themselves for re-appointment. A resolution for the re-appointment of KPMG as auditors of the Company is to be proposed at the forthcoming Annual General Meeting.

Independent auditor's report to the shareholders of CJ Global Holdings Limited

(Incorporated in Hong Kong with limited liability)

We have audited the consolidated financial statements of CJ Global Holdings Limited ("the Company") and its subsidiaries (together "the Group") set out on pages 6 to 69, which comprise the consolidated and company statements of financial position as at 31 December 2013, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated cash flow statement for the year then ended and a summary of significant accounting policies and other explanatory information.

Directors' responsibility for the financial statements

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the Hong Kong Companies Ordinance and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. This report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

Independent auditor's report to the shareholders of CJ Global Holdings Limited (continued)

(Incorporated in Hong Kong with limited liability)

Auditor's responsibility (continued)

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31 December 2013 and of the Group's loss and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the Hong Kong Companies Ordinance.

Notes to the financial statements

(Expressed in thousands of Hong Kong dollars unless otherwise indicated)

1 Significant accounting policies

(a) Statement of compliance

These financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong and the requirements of the Hong Kong Companies Ordinance. A summary of the significant accounting policies adopted by the Group is set out below.

The HKICPA has issued certain new and revised HKFRSs that are first effective or available for early adoption for the current accounting period of the Group and the Company. Note 1(c) provides information on any changes in accounting policies resulting from initial application of these developments to the extent that they are relevant to the Group for the current and prior accounting periods reflected in these financial statements.

(b) Basis of preparation of the financial statements

The consolidated financial statements for the year ended 31 December 2013 comprise the Company and its subsidiaries and the Group's interest in associates.

The measurement basis used in the preparation of the financial statements is the historical cost basis except that the following assets and liabilities are stated at their fair value as explained in the accounting policies as set out below:

- Defined benefit retirement plan obligations (see note 1(q) (ii));

- Share-based payments with cash alternatives (see note 1(q) (iii));

As shown in the statement of financial position, the Company and the Group had a deficiency in net current liabilities position as at 31 December 2013. The ultimate holding company, CJ Corporation, has confirmed its present intention to provide continuing financial support to the Company and the Group as it is necessary to maintain the Company and the Group as a going concern and enable them to meet their liabilities as and when they fall due.

On the strength of this assurance, the financial statements have been prepared on a going concern basis.

1 Significant accounting policies (continued)

(b) *Basis of preparation of the financial statements (continued)*

The preparation of financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of HKFRSs that have significant effect on the financial statements and major source of estimation uncertainty are discussed in note 2.

(c) *Changes in accounting policies*

The HKICPA has issued several amendments to HKFRSs that are first effective for the current accounting period of the group and the company. Of these, the following development is relevant to the group's financial statements:

- Amendments to HKAS 1, *Presentation of financial statements – Presentation of items of other comprehensive income*
- Revised HK*AS 19, Employee benefits*

The Group h*as not applied an*y new standard or interpretation that is not yet effective for the current accounting period.

Amendments to HKAS 1, Presentation of financial statements – Presentation of items of other comprehensive income

The amendments require entities to present separately the items of other comprehensive income that would be reclassified to profit or loss in the future if certain conditions are met from those that would never be reclassified to profit or loss. The presentation of other comprehensive income in the statement of profit or loss and other comprehensive income in these financial statements has been modified accordingly. In addition, the company has chosen to use the new title "statement of profit or loss and other comprehensive income" as introduced by the amendments in these financial statements.

1 Significant accounting policies (continued)

(c) *Changes in accounting policies (continued)*

Revised HKAS 19, Employee benefits

Revised HKAS 19 introduces a number of amendments to the recognition, measurement and disclosures of employee benefits. Among them, revised HKAS 19 revises the definitions of short-term and other long-term employee benefits and timing of recognition of termination benefits. These amendments do not have material impact on the company's financial statements.

(d) *Subsidiaries and non-controlling interests*

Subsidiaries are entities controlled by the group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the group has power, only substantive rights (held by the group and other parties) are considered.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances and transactions and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

Non-controlling interests represent the equity in a subsidiary not attributable directly or indirectly to the Company, and in respect of which the Group has not agreed any additional terms with the holders of those interests which would result in the Group as a whole having a contractual obligation in respect of those interests that meets the definition of a financial liability. For each business combination, the Group can elect to measure any non-controlling interests either at fair value or at their proportionate share of the subsidiary's net identifiable assets.

Non-controlling interests are presented in the consolidated statement of financial position within equity, separately from equity attributable to the equity shareholders of the Company. Non-controlling interests in the results of the Group are presented on the face of the consolidated income statement as an allocation of the total profit or loss for the year between non-controlling interests and the equity shareholders of the Company.

Changes in the Group's interests in a subsidiary that do not result in a loss of control are accounted for as equity transactions, whereby adjustments are made to the amounts of controlling and non-controlling interests within consolidated equity to reflect the change in relative interests, but no adjustments are made to goodwill and no gain or loss is recognised.

1 Significant accounting policies (continued)

(d) Subsidiaries and non-controlling interests (continued)

When the Group loses control of a subsidiary, it is accounted for as a disposal of the entire interest in that subsidiary, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former subsidiary at the date when control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset or, when appropriate, the cost on initial recognition of an investment in an associate(see note 1(e)).

In the Company's statement of financial position, an investment in a subsidiary is stated at cost less impairment losses (see note 1(j)).

(e) Associates

An associate is an entity in which the Group or Company has significant influence, but not control or joint control, over its management, including participation in the financial and operating policy decisions.

An investment in an associate is accounted for in the consolidated financial statements under the equity method, unless it is classified as held for sale. Under the equity method, the investment is initially recorded at cost, adjusted for any excess of the Group's share of acquisition-date fair values of investee's identifiable net assets over the cost of the investment (if any). Thereafter, the investment is adjusted for the post acquisition change in the Group's share of the investee's net assets and any impairment loss relating to the investment (see note 1(j)). Any acquisition-date excess over cost, the Group's share of the post-acquisition, post-tax results of the investees and any impairment losses for the year are recognised in the consolidated income statement, whereas the Group's share of the post-acquisition post-tax items of the investees' other comprehensive income is recognised in the consolidated statement of comprehensive income.

When the Group's share of losses exceeds its interest in the associate, the Group's interest is reduced to nil and recognition of further losses is discontinued except to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the investee. For this purpose, the Group's interest is the carrying amount of the investment under the equity method together with the Group's long-term interests that in substance form part of the Group's net investment in the associate.

Unrealised profits and losses resulting from transactions between the Group and its associates are eliminated to the extent of the Group's interest in the investee, except where unrealised losses provide evidence of an impairment of the asset transferred, in which case they are recognised immediately in profit or loss.

In the Company's statement of financial position, investments in associates are stated at cost less impairment losses (see note 1(j)), unless classified as held for sale.

1 Significant accounting policies (continued)

(f) Investment property

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes. Investment property is measured at cost on initial recognition and subsequently stated in the consolidated statement of financial position at cost less accumulated depreciation and impairment losses (see note 1(j)). Depreciation is calculated to write off the cost, less their estimated residual value, if any, using the straight-line method over their estimated useful lives (see note 1(g)).

Gains or losses arising from the retirement or disposal of an investment property are determined as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss on the date of retirement or disposal.

(g) Property, plant and equipment, including construction in progress

Freehold land held for own use is stated in the consolidated statement of financial position at cost.

Property, plant and equipment (except for freehold land held for own use) are stated in the consolidated statement of financial position at cost less accumulated depreciation and impairment losses (see note 1(j)).

Construction in progress represents property, plant and equipment under construction and equipment pending installation, and is initially recognised in the statement of financial position at cost less impairment losses (see note 1(j)). Cost comprises cost of materials, direct labour and an appropriate proportion of production overheads. Capitalisation of these costs ceases and the construction in progress is transferred to property, plant and equipment when the asset is substantially ready for its intended use.

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss on the date of retirement or disposal.

1 Significant accounting policies (continued)

(g) Property, plant and equipment, including construction in progress (continued)

Depreciation is calculated to write off the cost of items of property, plant and equipment, less their estimated residual value, if any, using the straight-line method over their estimated useful lives as follows:

- Freehold land	Not depreciated
- Buildings	20 - 30 years
- Leasehold improvements	Over the shorter of their useful lives or lease terms
- Plant, machinery, furniture and equipment	3 - 10 years
- Motor vehicles	3 - 5 years

Where parts of an item of property, plant and equipment have different useful lives, the cost of the item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reviewed annually.

(h) Intangible assets

Intangible assets that are acquired by the Group are stated in the statement of financial position at cost less accumulated amortisation (where the estimated useful life is finite) and impairment losses (see note 1(j)).

Amortisation of intangible assets with finite useful lives is charged to profit or loss on a straight-line basis over the assets' estimated useful lives. Intangible assets of the Group include acquired software development costs and other related costs, which are amortised over their estimated useful lives (three to ten years).

Both the period and method of amortisation are reviewed annually.

(i) Lease prepayments

Lease prepayments represent cost of land use rights in the PRC and Vietnam. Land use rights are carried at cost less accumulated amortisation and impairment losses (see note 1(j)). Amortisation is charged to profit or loss on a straight-line basis over the lease term.

1 Significant accounting policies (continued)

(j) Impairment of assets

(i) Impairment of investments in debt securities and other receivables

Investments in debt securities and other current and non-current receivables that are stated at cost or amortised cost or are classified as available-for-sale securities are reviewed at the end of each reporting period to determine whether there is objective evidence of impairment. Objective evidence of impairment includes observable data that comes to the attention of the Group about one or more of the following loss events:

- significant financial difficulty of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the debtor will enter bankruptcy or other financial reorganisation; and
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor.

If any such evidence exists, any impairment loss is determined and recognised as follows:

- For investments in subsidiaries and associates, the impairment loss is measured by comparing the recoverable amount of the investment with its carrying amount in accordance with note 1(j)(ii). The impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount in accordance with note 1(j)(ii).
- For trade and other current receivables and other financial assets carried at amortised cost, the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of these assets), where the effect of discounting is material. This assessment is made collectively where these financial assets share similar risk characteristics, such as similar past due status, and have not been individually assessed as impaired. Future cash flows for financial assets which are assessed for impairment collectively are based on historical loss experience for assets with credit risk characteristics similar to the collective group.

1 Significant accounting policies (continued)

(j) Impairment of assets (continued)

(i) Impairment of investments in debt securities and other receivables (continued)

If in a subsequent period the amount of an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. A reversal of an impairment loss shall not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

Impairment losses are written off against the corresponding assets directly, except for impairment losses recognised in respect of trade debtors and bills receivable included within trade and other receivables, whose recovery is considered doubtful but not remote. In this case, impairment losses for doubtful debts are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off against trade and other receivables directly and any amounts held in the allowance account relating to that debt are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

(ii) Impairment of other assets

Internal and external sources of information are reviewed at the end of each reporting period to identify indications that the following assets may be impaired or an impaired loss previously recognised no longer exists or may have decreased:

- property, plant and equipment;
- construction in progress;
- lease prepayments;
- investment properties;
- intangible assets; and
- biological assets

If any such indication exists, the asset's recoverable amount is estimated.

- Calculation of recoverable amount

  The recoverable amount of an asset is the greater of its fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

1 Significant accounting policies (continued)

(j) Impairment of assets (continued)

(ii) Impairment of other assets (continued)

- Recognition of impairment losses

An impairment loss is recognised in profit or loss whenever the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amount of the assets in the unit (or group of units) on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs to sell, or value in use, if determinable.

- Reversals of impairment losses

An impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount

A reversal of impairment losses is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

(k) Biological assets

Biological assets are measured on initial recognition and at each balance sheet date at fair value less estimated point-of-sales costs, except when, on initial recognition, market-determined prices or values are not available and for which alternative estimates of fair value are determined to be clearly unreliable. In such cases, those biological assets are measured at accumulated costs less any accumulated depreciation and any accumulated impairment losses (see note 1(j)). Once the fair value of such biological assets becomes reliably measurable, those biological assets are measured at fair value less estimated point-of-sale costs.

For the years ended 31 December 2013 and 2012, some bearer biological assets or immature biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses because their fair value cannot be estimated reliably, attributable to the uncertain market prices in local markets where relevant subsidiaries operate in. Expenditures on these assets subsequent to initial recognition, excluding the cost of day to day servicing are capitalised. Depreciation is calculated on a straight-line basis over their estimated useful lives.

1 Significant accounting policies (continued)

(l) Inventories

Inventories are carried at the lower of cost and net realisable value.

Cost is calculated using the weighted average cost formula and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the year in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the year the write-down or loss occurs. The amount of any reversal of any write-down of inventories is recognised as a reduction in the amount of inventories recognised as an expense in the year in which the reversal occurs.

(m) Trade and other receivables (including amounts due from related parties)

Trade and other receivables (including amounts due from related parties) are initially recognised at fair value and thereafter stated at amortised cost using the effective interest method less allowance for impairment of doubtful debts, except where the receivables are interest-free loans made to related parties without any fixed repayment terms or the effect of discounting would be immaterial. In such cases, the receivables are stated at cost less allowance for impairment of doubtful debts (see note 1(j)).

(n) Interest-bearing borrowings

Interest-bearing borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost with any difference between the amount initially recognised and redemption value being recognised in profit or loss over the period of the borrowings, together with any interest and fees payable, using the effective interest method.

(o) Trade and other payables (including amount due to related parties)

Trade and other payables (including amounts due to related parties) are initially recognised at fair value and subsequently stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at cost.

1 Significant accounting policies (continued)

(p) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions, and short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition.

(q) Employee benefits

(i) Short term employee benefits and contributions to defined contribution retirement plans

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

(ii) Defined benefit retirement plan obligations

The Group's net obligation in respect of defined benefit retirement plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine the present value and the fair value of any plan assets is deducted. The discount rate is the yield at the end of reporting period on high quality corporate bonds that have maturity dates approximating the terms of the Group's obligations. The calculation is performed by a qualified actuary using the Projected Unit Credit method.

When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is recognised as an expense in profit or loss on a straight line basis over the average period until the benefits become vested. If the benefits vest immediately, the expense is recognised immediately in profit or loss.

In calculating the Group's obligation in respect of a plan, if any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the defined benefit obligation and the fair value of plan assets, that portion is recognised in profit or loss over the expected average remaining working lives of the employees participating in the plan. Otherwise, the actuarial gain or loss is not recognised.

Where the calculation of the Group's net obligation results in a negative amount, the asset recognised is limited to the net total of any cumulative unrecognised net actuarial losses and past service costs and the present value of any future refunds from the plan or reductions in future contributions to the plan.

1 Significant accounting policies (continued)

(q) Employee benefits (continued)

(iii) Share-based payments with cash alternatives

As the option granted gives the employees the right to choose whether the share-based payment is settled in cash or by issues shares, the option granted is a compound financial instrument which includes a debt component (i.e. the employee's right to demand cash) and a equity component (i.e. the employee's right to demand shares). For the debt component, the fair value of the share options granted to employee is recognised as an employee cost with a corresponding increase in a liability. For the equity component, the fair value of the share options granted to employee is recognised as an employee cost with a corresponding increase in a capital reserve within equity. On settlement date, the share options granted to employee are fair valued and if:

(a) the employee choose settlement by way of shares, then the fair value of the share options is recognised directly to equity (when it is transferred to the share premium account) as the consideration of shares issued; or

(b) the employee choose settlement by way of cash, then the payment shall be used to settle the liability in full. Any capital reserve component previously recognised shall remain within equity.

The fair value is measured at grant date using the Black-Scholes model, taking into account the terms and conditions upon which the options were granted. Where the employees have to meet vesting conditions before becoming unconditionally entitled to the options, the total estimated fair value of the options is spread over the vesting period, taking into account the probability that the options will vest.

During the vesting period, the number of share options that is expected to vest is reviewed. Any resulting adjustment to the cumulative fair value recognised in prior years is charged/credited to the profit or loss for the year of the review, unless the original employee expenses qualify for recognition as an asset, with a corresponding adjustment to the capital reserve. On vesting date, the amount recognised as an expense is adjusted to reflect the actual number of options that vest (with a corresponding adjustment to the capital reserve) except where forfeiture is only due to not achieving vesting conditions that relate to the market price of the Company's shares. The equity amount is recognised in the capital reserve until either the option is exercised (when it is transferred to the share premium account) or the option expires (when it is released directly to retained profits).

(r) *Income tax*

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or directly in equity, respectively.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the end of reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

Apart from certain limited exceptions, all deferred tax liabilities, and all deferred tax assets to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

The limited exceptions to recognition of deferred tax assets and liabilities are those temporary differences arising from goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the Group controls the timing of the reversal and it is probable that the differences will not reverse in the foreseeable future, or in the case of deductible differences, unless it is probable that they will reverse in the future.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the end of the reporting period. Deferred tax assets and liabilities are not discounted.

1 Significant accounting policies (continued)

(r) Income tax (continued)

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

Additional income taxes that arise from the distribution of dividends are recognised when the liability to pay the related dividends is recognised.

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities, if the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

- in the case of current tax assets and liabilities, the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or

- in the case of deferred tax assets and liabilities, if they relate to income taxes levied by the same taxation authority on either:

  - the same taxable entity; or

  - different taxable entities, which, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered, intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

(s) Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group or the Company has a legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

1 Significant accounting policies (continued)

(t) Revenue recognition

Provided it is probable that the economic benefits will flow to the Group and the revenue and costs, if applicable, can be measured reliably, revenue is recognised in profit or loss as follows:

(i) Sale of goods

Revenue is recognised when goods are delivered at the customers' premises which is taken to be the point in time when the customer has accepted the goods and the related risks and rewards of ownership have been transferred to the customers. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

(ii) Interest income

Interest income is recognised as it accrues using the effective interest method.

(iii) Dividend income

Dividend income from unlisted investments is recognized when the shareholder's right to receive payment is established.

(u) Translation of foreign currencies

Foreign currency transactions during the year are translated at the foreign exchange rates ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated at the foreign exchange rates ruling at the end of the reporting period. Exchange gains and losses are recognised in profit or loss, except those arising from foreign currency borrowings used to hedge a net investment in a foreign operation which are recognised in other comprehensive income.

Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the foreign exchange rates ruling at the transaction dates. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated using the foreign exchange rates ruling at the dates the fair value was determined.

The results of foreign operations are translated into Hong Kong dollars at the exchange rates approximating the foreign exchange rates ruling at the dates of the transactions. Statement of financial position items are translated into Hong Kong dollars at the closing foreign exchange rates at the end of the reporting period. The resulting exchange differences are recognised in other comprehensive income and accumulated separately in equity in the exchange reserve.

1 Significant accounting policies (continued)

(u) Translation of foreign currencies (continued)

On disposal of an operation outside Hong Kong, the cumulative amount of the exchange differences recognized in equity which relate to that foreign operation is included in the calculation of the profit or loss on disposal.

(v) Related parties

(a) A person, or a close member of that person's family, is related to the group if that person:

(i) has control or joint control over the group;

(ii) has significant influence over the group; or

(iii) is a member of the key management personnel of the group or the group's parent.

(b) An entity is related to the group if any of the following conditions applies:

(i) The entity and the group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

(iii) Both entities are joint ventures of the same third party.

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

(v) The entity is a post-employment benefit plan for the benefit of employees of either the group or an entity related to the group.

(vi) The entity is controlled or jointly controlled by a person identified in (a).

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

2 Accounting estimates and judgements

In the process of applying the Group's accounting policies, management has made the following accounting judgements:

(i) Depreciation

Property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives, after taking into the account the estimated residual value. The Group reviews the estimated useful lives of the assets regularly in order to determine the amount of depreciation expense to be recorded during any reporting period. The useful lives are based on the Group's historical experience with similar assets and taking into account anticipated technological changes. The depreciation expense for future periods is adjusted if there are significant changes from previous estimates.

(ii) Impairment of assets

If circumstances indicate that the carrying amount of an asset may not be recoverable, this asset may be considered "impaired", and an impairment loss may be recognised in profit or loss. The carrying amounts of assets are reviewed periodically in order to assess whether the recoverable amounts have declined below the carrying amounts. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to recoverable amount. The recoverable amount is the greater of the fair value less costs to sell and the value in use. In determining the value in use, expected cash flows generated by the asset are discounted to their present value, which requires significant judgement relating to the level of sales revenue and amount of operating costs. The Company uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions and projections of sales revenue and amount of operating costs.

3 Turnover

The principal activities of the Group are manufacturing, selling and research and development of animal feeds and live stocks in the PRC, Indonesia, the Philippines, Vietnam and India.

3 Turnover (continued)

Turnover represents the sales value of goods supplied to customers and excludes value added tax or other sales tax and is after deduction of any trade discount. The amount of each significant category of revenue recognised in turnover during the year is as follows:

	2013	*2012*
	$'000	$'000
Animal feeds	6,050,579	5,132,649
Live stocks	1,195,254	833,192

Provision for the year	30,950	62,353
Deferred taxation		
Origination and reversal of temporary differences	231	(4,177)
	31,181	58,176

The provision for Hong Kong Profits Tax for 2013 is calculated at 16.5% (2012: 16.5%) of the estimated assessable profits for the year. No Hong Kong profits tax has been provided in the financial statements as the Group and the Company have no estimated assessable profit for Hong Kong taxation purpose for the year (2012: $Nil).

Taxation on overseas profits has been calculated on the estimated assessable profit for the year at the rates of taxation prevailing in the countries in which the Group operates. The applicable tax rates for overseas entities are varied from 10% to 33.99% in 2013 (2012: 10% to 33.99%).

Provision for PRC income tax for 2013 was taxable at statutory income tax rate of 25%.

In addition, under the new tax law and pursuant to a double tax arrangement between the PRC and Hong Kong, the Group will be liable to 5% withholding tax on dividends distributed from the Group's subsidiaries in the PRC in respect of profits generated after 1 January 2008. No deferred tax liabilities have been recognised for the distributable profits of the subsidiaries in the PRC that are generated after 1 January 2008 as there is no distribution plan by the subsidiaries in the foreseeable future.

7 Directors' remuneration

Directors' remuneration disclosed pursuant to section 161 of the Hong Kong companies Ordinance is as follows:

	2013 $'000	*2012* $'000
Salaries and other emoluments	1,394	332
Share based payments with cash alternatives (note (i))	(219)	807
	1,175	1,139

7 Directors' remuneration (continued)

(i) This represent the estimated value of share options granted to the director under the Company's share option scheme. The value of these share options is measured according to the Group's accounting policies for share-based payment transactions as set out in note 1(q)(iii) and, in accordance with that policy, includes adjustments to reverse amounts accrued in previous years where grants of equity instruments are forfeited prior to vesting.

The details of these benefits in kind, including the principal terms and number of options granted, are disclosed under the paragraph "Share option scheme" in the report of the directors and note 28.

8 Loss attributable to equity shareholders of the Company

The consolidated loss attributable to equity shareholders of the Company includes a loss of $4,469,000 (2012: loss of $6,326,000) which has been dealt with in the financial statements of the Company.

Reconciliation of the above amount to the Company's loss for the year:

	2013	*2012*

Less: allowance for doubtful debts (note b)	(11,246)	(15,810)
	378,953	359,064

All of the trade receivables are expected to be recovered within one year. Credit terms may be granted to customers, depending on the credit assessment carried out by management on an individual basis.

(a) *Ageing analysis*

An ageing analysis of trade receivables (net of allowance for doubtful debts) as of the end of the reporting period is as follows:

	The Group	
	2013	2012
	$'000	$'000
Current	280,190	270,480
Less than 1 month past due	52,686	45,042
1 to 3 months past due	13,997	13,012
More than 3 months but less than 12 months past due	13,852	8,096
More than 12 months past due	18,228	22,434
	378,953	359,064

Trade receivables are mainly due within 30 to 90 days from the date of billing. Further details on the Group's credit policy are set out in note 24(a).

16 Trade receivables (continued)

(a) Ageing analysis (continued)

Receivables that were past due but not impaired relate to a number of customers for whom there was no recent history of default.

(b) Impairment of trade receivables and bills receivable

Impairment losses in respect of trade receivables are recorded using an allowance account unless the Group is satisfied that recovery of the amount is remote, in which case the impairment loss is written off against trade receivables directly (see note 1(j) (i)).

The movement in the allowance for doubtful debts during the year, including both specific and collective loss components, is as follows:

	The Group	
	2013	*2012*
	$'000	$'000
At 1 January	15,810	28,876
Impairment loss recognised	3,996	3,379
Uncollectible amounts written off	(7,457)	(2,273)
Write-back of impairment losses for trade receivables	(1,576)	(13,681)
Foreign exchange translation adjustments	473	(491)
At 31 December	11,246	15,810

At 31 December 2013, the Group's trade receivable (before impairment) of $41,260,000 (2012: $31,259,573) were individually determined to be impaired. The individually impaired receivables related to customers that were in financial difficulties and management assessed that only a portion of the receivables is expected to be recovered. Consequently, individually assessed allowances for doubtful debts of $11,246,000 (2012: $14,725,692) were recognised. As 31 December 2013, the Group holds sufficient collateral over these balances amounting to $30,014,000 (2012: $15,742,641).

16 Trade receivables (continued)

(c) *Trade receivables that are not impaired*

The ageing analysis of trade debtors that are neither individually nor collectively considered to be impaired are as follows:

	The Group	
	2013	2012
	$'000	$'000
Neither past due nor impaired	280,190	270,480
Less than 1 month past due	52,686	45,042
1 to 3 months past due	13,997	13,012
More than 3 months but less than 12 months past due	2,066	-
	68,749	58,054
	348,939	328,534

Receivables that were neither past due nor impaired relate to a wide range of customers for whom there was no recent history of default.

Receivables that were past due but not impaired relate to a number of independent customers that have a good track record with the Group. Based on past experience, management believes that no impairment allowance is necessary in respect of these balances as there has been no significant change in credit quality and the balances are still considered fully recoverable. At 31 December 2013, the Group holds sufficient collateral over the above receivable balances amounting to $7,135,000 (2012: $34,770,167).

17 Prepayments, deposits and other receivables

21 Income tax in the statement of financial position (continued)

(a) Taxation in the statement of financial position represents: (continued)

In 2010, the Indonesian tax authorities carried out a review of the 2008 Corporate Income Tax ("CIT") submitted by two subsidiaries of the Group in Indonesia, PT CJFJ and PT CJS. As a result of the review, the two subsidiaries paid an additional tax of Indonesian Rupiah ("IDR") 23,857,149,000 or HK$20,414,000 in respect of 2008 CIT. In addition, the Indonesian tax authorities also required the two subsidiaries to revise their 2009 CIT computations to be in line with the results of their investigation and following the submission of the revised CIT computation for 2009, the two subsidiaries made an additional tax payment of IDR19,868,314,000 or HK$17,007,000 in 2010. The above payments made, totally IDR43,725,463,000 or HK$37,421,000, were included as tax recoverable as at 31 December 2010.

During 2011, PT CJFJ and PT CJS filed appeals to the Indonesian Tax Court for the above dispute against the Directorate General of Taxes and it has successfully won part of the dispute as follows:

- In connection with the 2008 CIT dispute, except for approximately IDR5.3 billion or HK$4.7 million, the additional tax paid was refunded by the Indonesian tax authorities. For the amount not yet recovered of approximately HK$4.7 million, PT CJFJ and PT CJS filed additional appeals to the Indonesian Tax Court on 12 October 2011. As at 31 December 2013, management assesses that it is not probable to determine the ultimate outcome of this tax dispute, and accordingly the Group did not recognize income tax recoverable or deferred tax asset on this uncertain amount, IDR5.3 billion or HK$4.7 million.

- In connection with the 2009 CIT dispute, the additional tax paid of IDR19,868,314,000 or HK$17,007,000 was fully utilized by PT CJFJ and PT CJS as tax credits against their 2011 CIT payments.

(c) *Deferred tax assets and liabilities not recognised:*

In accordance with the accounting policy set out in note 1(r), the Group has not recognised deferred tax assets in respect of cumulative tax losses of $346,400,000 (2012: $127,970,000) as it is not probable that future taxable profits against which the losses can be utilised will be available in the relevant tax jurisdictions and entities.

The details are as follows:

	The Group 2013 $'000	*The Group* 2012 $'000
Jurisdictions concerned:		
- People's Republic of China ("PRC")	60,373	42,749
- Indonesia	187,907	18,160
- Vietnam	21,389	953
- Hong Kong	76,731	66,108
	346,400	127,970

21 Income tax in the statement of financial position (continued)

(c) *Deferred tax assets and liabilities not recognised (continued):*

Expiry dates of cumulative tax losses under current tax legislations as at 31 December 2013

- Hong Kong:	No expiry date
- PRC:	From 2014 to 2018
- Indonesia:	From 2014 to 2018
- Vietnam:	From 2015 to 2018

No deferred tax liabilities has been recognised in respect of the tax that would be payable on the distribution of the retained profits from certain subsidiaries located in China, Vietnam and Indonesia as the Company controls the dividend policy of these subsidiaries and it has been determined that it is probable that profits will not be distributed in the foreseeable future.

Except for the above, the Group did not have material unrecognised deferred tax assets or liabilities as at 31 December 2013 and 2012.

The holder of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company. All ordinary shares rank equally with regard to the Company's residual assets.

(d) Nature and purpose of reserves

(i) Merger reserve

The merger reserve of the Group represents the difference between the nominal amount of the share capital issued by the Company and the aggregate nominal amount of the share capital and the capital surplus of the subsidiaries transferred to the Company pursuant to the reorganisation of the Group.

(ii) Exchange reserve

The exchange reserve comprises all foreign exchange differences arising from the translation of the financial statements of operations outside Hong Kong which is dealt with in accordance with the accounting policies set out in note 1(u).

(iii) Surplus reserve

The Group's wholly owned subsidiaries in the PRC are required to transfer 10% of their net profits, as determined in accordance with the Rules for The Implementation of The Law of The People's Republic of China on Foreign-capital Enterprises (Revised), to the general reserve fund until the balance reaches 50% of the registered capital.

The general reserve fund can be used for the subsidiaries' working capital purposes and to make up for previous years' losses, if any. This fund can also be used to increase capital of the subsidiaries, if approved. This fund is non-distributable other than upon liquidation. Transfers to this fund must be made before distributing dividends to the company.

23 Capital and reserves (continued)

(e) Capital management

The Group's primary objectives when managing capital are to safeguard the Group's ability to continue as a going concern, so that it can continue to provide returns for shareholders, by pricing products and services commensurately with the level of risk and by securing access to finance at a reasonable cost.

The Group defines "capital" as including all components of equity plus long term debentures and any loans from other Group companies with no fixed terms of repayment, less unaccrued proposed dividends. Trading balances that arise as a result of trading transactions with other Group companies are not regarded by the Group as capital.

The Group's capital structure is regularly reviewed and managed with due regard to the capital management practices of the Group. Adjustments are made to the capital structure in light of changes in economic conditions affecting the Group, to the extent that these do not conflict with the directors' fiduciary duties towards the Group or the requirements of the Hong Kong Companies Ordinance.

Neither the Company nor its subsidiaries are subject to externally imposed capital requirements.

24 Financial risk management and fair values

Exposure to credit, liquidity, interest rate and currency risks arises in the normal course of the Group's business. The Group's exposure to these risks and the financial risk management policies and practices described below.

(a) Credit risk

The Group's credit risk is primarily attributable to trade and other receivables. Management has a credit policy in place and the exposures to these credit risks are monitored on an ongoing basis.

In respect of trade receivables, individual credit evaluations are performed on all customers requiring credit. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer as well as pertaining to the economic environment in which the customer operates. Trade receivables are mainly due within 30 to 90 days from the date of billing. Normally, the Group does not obtain collateral from customers.

Investments are normally only in liquid securities quoted on a recognised stock exchange, except where entered into for long term strategic purposes. Transactions involving derivative financial instruments are with counterparties of sound credit standing and with whom the Group has a signed netting agreement. Given their high credit standing, management does not expect any investment counterparty to fail to meet its obligations.

24 Financial risk management and fair values (continued)

(a) Credit risk (continued)

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer rather than the industry or country in which the customers operate and therefore significant concentrations of credit risk primarily arise when the Group has significant exposure to individual customers. At the end of the reporting period, 23% (2012: 5%) and 32% (2012: 15%) of the total trade receivable was due from the Group's largest customer and the five largest customers respectively.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset after deducting any impairment allowance. The Group does not provide any guarantees which would expose the Group or the Company to credit risk.

Further quantitative disclosures in respect of the Group's exposure to credit risk arising from trade receivables are set out in note 16.

(b) Liquidity risk

Individual operating entities within the Group are responsible for their own cash management, including the raising of loans to cover expected cash demands, subject to approval by the parent company's board when the borrowings exceed certain predetermined levels of authority. The Group's policy is to regularly monitor its liquidity requirements and its compliance with lending covenants, to ensure that it maintains sufficient reserves of cash and readily realisable marketable securities and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and longer term.

24 Financial risk management and fair values (continued)

(b) *Liquidity risk (continued)*

The following table show the remaining contractual maturities at the end of the reporting period of the Group's and the Company's non-derivative financial liabilities, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of the reporting period) and the earliest date the Group and the Company can be required to pay:

(c) *Interest rate risk*

The Group's interest rate risk arises primarily from long-term borrowings. Borrowings issued at variable rates and at fixed rates expose the Group to cash flow interest rate risk and fair value interest rate risk respectively.

The Group's interest rate profile as monitored by management is set out in (i) below.

24 Financial risk management and fair values (continued)

(c) Interest rate risk (continued)

(i) Interest rates profile

	The Group				The Company			
	2013 Effective interest rate (%)	$'000	2012 Effective interest rate (%)	$'000	2013 Effective interest rate (%)	$'000	2012 Effective interest rate (%)	$'000

Variable rate borrowings:								
Bank loans	1.5% -18%	848,434	1.55% -11%	514,469	-	-	2.02%	181,385

(ii) Sensitivity analysis

At 31 December 2013, it is estimated that a general increase/decrease of 50 basis points in interest rates, with all other variables held constant, would have decreased/increased the Group's post-tax loss and retained profits by approximately $4,242,000 (2012: $2,572,000).

(d) Currency risk

The Group is exposed to currency risk primarily through sales and purchases which give rise to receivables, payables and cash balances that are denominated in a foreign currency, i.e. a currency other than the functional currency of the operations to which the transactions relate. The currencies giving rise to this risk are primarily United Stated dollars.

The foreign exchange risk of the Group is primarily attributable to the foreign operations located in Southeast Asia and Mainland China. Foreign exchange risk is managed primarily through borrowings denominated in the relevant foreign currencies. The Group monitors foreign exchange exposure and will consider entering into forward foreign exchange contracts to reduce the exposure should the need arise.

The Company is not exposed to significant foreign currency risk. It is assumed that the pegged rate between the Hong Kong dollar and the United States dollar would be materially unaffected by any changes in movement in value of the United State dollar against other currencies.

(d) Currency risk (continued)

(i) Exposure to currency risk

The following table details the Group's exposure at the end of the reporting period currency risk arising from recognised assets or liabilities denominated in a currency other than the functional currency of the entity to which they relate.

For presentation purposes, the amounts of the exposure are shown in Hong Kong dollars, translated using the spot rate at the year end date. Differences resulting from the translation of the financial statements of foreign operations into the Group's presentation currency are excluded.

(ii) Sensitivity analysis

The following table indicates the instantaneous change in the Group's profit after tax (and retained profits) that would arise if foreign exchange rates to which the Group has significant exposure at the end of the reporting period had changed at that date, assuming all other risk variables remained constant. Other components of equity would not be affected by changes in the foreign exchange rates.

(d) Currency risk (continued)

(ii) Sensitivity analysis (continued)

Results of the analysis as presented in the above tables represent an aggregation of the instantaneous effects on each of the Group entities' profit after tax and equity measured in the respective functional currencies, translated into Hong Kong dollars at the exchange rate ruling at the end of the reporting period for presentation purposes.

The sensitivity analysis assumes that the change in foreign exchange rates had been applied to re-measure those financial instruments held by the Group which expose the Group to foreign currency risk at the end of the reporting period, including inter-company payables and receivables within the Group which are denominated in a currency other than the functional currencies of the lender or the borrower. The analysis excludes differences that would result from the translation of the financial statements of foreign operations into the Group's presentation currency. The analysis is performed on the same basis for 2012.

(e) Fair values

All financial instruments are carried at amounts not materially different from their fair values as at 31 December 2013 and 2012.

28 Share-based payments with cash alternatives

Under a share option agreement dated 28 March 2008, the Company issued a share option scheme to the two directors (hereinafter called "Grantees") of the Company to take up the options to subscribe for shares of the Company or in the form of cash. The purpose of this scheme is to provide an opportunity for the Grantees to acquire an equity participation in the Company and its shares for the work towards enhancing the value of the Company and its shares for the benefit of the Company and its shareholder as a whole. The share option scheme shall be valid and effective for a period of 8 years ending 27 March 2016 and it vested on 31 March 2011. The options are exercisable within a period of 5 years expiring on 27 March 2016.

During the year, a director of the Company, Mr Park Ho In, resigned on 14 April 2013. As a result of his resignation, the Company settled the share options granted to the director and outstanding as at his resignation date in the form of cash and cancelled them on the same date. The number of options settled was 150,000 and the cash payment amounted to HK$978,000.

No other share option scheme to employees or directors of the Company and the Group has been adopted or granted.

At 31 December 2013, a director of the Company had the following interests in options to subscribe for shares of the Company or in the form of cash granted for nil consideration under the share option scheme of the Company. The options are unlisted and each option gives the holder the right to subscribe for one ordinary share each of the Company.

(a) *The terms and conditions of the grants are as follows:*

No. of options granted during the year	*No. of options outstanding at the year end*	*Date granted*	*Period during which options are exercisable*	*Exercise price per share*	*Market value per share at the grant of options*	*Market value per share at year end*
-	150,000	28 March 2008	1 April 2011 to 31 March 2016	HK$5.00	HK$4.15	HK$9.94

(b) *Fair value of share options and assumptions*

The fair value of services received in return for share options granted is measured by reference to the fair value of share options granted. The estimate of the fair value of the share options granted is measured based on a Black-Scholes Model.

28 Share-based payments with cash alternatives (continued)

(b) Fair value of share options and assumptions (continued)

Fair value of share options and assumptions	*2013*	*2012*
Fair value at measurement date	HK$5.06	HK$6.52
Estimated stock price	HK$9.94	HK$11.30
Exercise price	HK$5.00	HK$5.00
Volatility of the Company's share price	32%	36%
Expected life (years)	2 years	3 years
Risk free rate	0.33%	0.12%
Expected dividend yield	Nil	Nil

The expected volatility is based on a selected group of similar sized companies listed in Hong Kong.

Share options were granted under a service condition. This condition has not been taken into account in the grant date fair value measurement of the services received. There was no market conditions associated with the share option grants.

29 Immediate and ultimate controlling party

At 31 December 2013, the directors consider the immediate holding company and ultimate controlling party to be CJ Cheil Jedang Corporation and CJ Corporation, respectively, which are incorporated in Korea. Both entities produce financial statements available for public use.

30 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 December 2013

Up to the date of issue of these financial statements, the HKICPA has issued a number of amendments and new standards which are not yet effective for the year ended 31 December 2013 and which have not been adopted in these financial statements. These include the following which may be relevant to the group.

	Effective for accounting periods beginning on or after
Amendments to HKAS 32, *Offsetting financial assets and financial liabilities*	1 January 2014
Amendments to HKAS 39, *Novation of derivatives and continuation of hedge accounting*	1 January 2014
HKFRS 9, *Financial instruments*	1 January 2015

The group is in the process of making an assessment of what the impact of these amendments is expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the company's results of operations and financial position.

Waste Water Treatment Plan

1. Capacity

Division	Phase1	Unit	Remarks
Domestic	35.5	m3/d	Toilet + Shower + Canteen + Sterlizer
Total	35.5	m3/d	
Design capacity	40.0	m3/d	

2. Domestic Sewage and Other Waste Water Treatment

Division	Location of Generation	Treatment
Domestic (③)	toilet/washstand/shower	√ Utilize water-purifier tank (install according to national standards)
Process Water (1 + 2)	Boiler	√ Indirect steam (heat insulation, etc.): condensate is reused after return
		√ Direct steam: directly injected and added to the products
	Sterilization Tank	√ Sterilizing factory vehicles: directly sprayed on the vehicles
	Liquids	√ Brix adjustment by adding water in liquid (e.g., molasses etc.)
	Machine Washing	√ Conduct air cleaning only if necessary (solids removal, no water washing process)
Others	Quality analysis room	√ Certain chemicals used for the product's chemical composition and physical analysis are separately collected and then processed by a contracted waste disposal company

*** There is is no waste water generated in the process and only domestic sweage is generated**

*** All the water used in the production process is flew into the product and consumed**
